PHP Developer – Laravel Developer

Description

We are looking for an individual with a strong skill set in using PHP, MySQL and Java Script.

The position needs strengths in the performance and user experience with superior development skills for the ongoing development of Digerati Labs' products as well as custom projects.

Responsibilities

- Experience with RESTful Web Services technologies like JSON, SOAP and HTTP
- Experience working with third-party APIs and web services
- Strong understanding of OOPS
- Experience with Laravel, Lumen and/or WordPress.
- Assist in the architecture and development of technology solutions to meet business requirements across multiple product lines
- Document all solutions and maintain ongoing development plan and production schedule
- Responsible for documentation of tasks to ensure efficient maintenance and code reuse
- Stay current with trends, techniques, technology and other factors impacting the job
- Actively participate in team meetings and offer recommendations/ideas on design projects

Qualifications

- Degree in Computer Science/Software Programming, Bachelor or Masters.
- 3+ years in MySQL database design and performance
- 2+ years experience in OOP PHP & MVC
- Strong problem-solving skills, analytical skills

The Nice to Have:

- Knowledge of Proficiency in leading-edge front-end technologies similar to ReactJS, Angular, Vue JS, HTML5, etc.
- Experience working with GIT in a team environment
- Experience with Test Driven Development (TDD)
